# BOOKING *Sea Containers* *has never been easier!*

**Coming soon**, Freight Trades is a brand new website that will enable users to instantly compare current container shipping rates and book directly online. Serving as an important link between shipping lines and clients, Freight Trades will greatly simplify the way sea containers are booked.

Designed for importers, exporters and freight forwarders, this online portal will be the first of its kind in the industry.

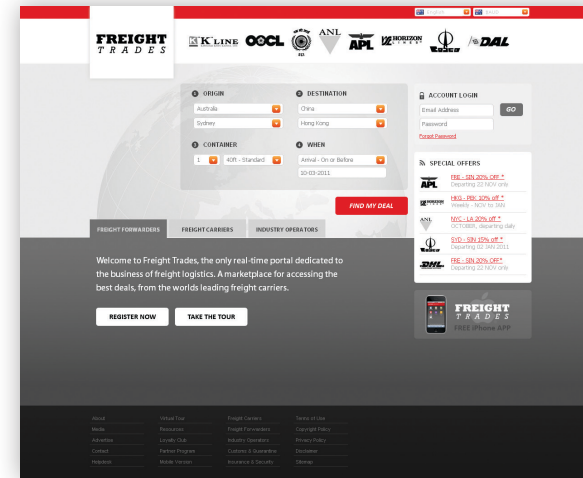

Users will be able to search for trade lanes and instantly access the rates, schedules and space availability of different shipping lines, helping them to quickly secure the best deals available.

By harnessing the power of the internet, our aim is to eventually replace the time consuming practice of clients needing to call or email various shipping lines to compare rates and services, a process which can often take hours or even days.

Freight Trades will provide a very intuitive and easy to use one stop search and booking facility for sea freight, allowing users immediate access to an ocean of information at their fingertips.

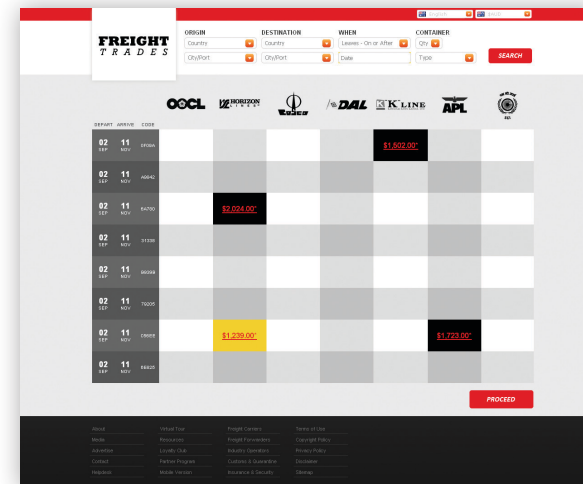

Saving hours of staff time and costly delays, this website will be a powerful marketing tool for shipping lines, who can promote specials, spot rates and new services to a broader potential client base within seconds.
